

COMPANY OVERVIEW

Cultivating Coders is an SBA 8(a) certified technology consulting firm based in Albuquerque, New Mexico. Founded over a decade ago as one of the region's most respected coding education programs, we have evolved into a full-service IT consulting firm delivering security assessments, software development, platform management, and systems engineering to federal agencies and higher education institutions nationwide.

Our roots in technology education give us a rare perspective: we understand how systems are built, how they break, and how people learn to use them. That foundation shapes the way we approach every engagement - with clarity, accountability, and a commitment to outcomes over activity.

CORE CAPABILITIES

Security & Application Assessments

NAICS 541511 · 541512

- Application vulnerability analysis
- Code-level security reviews
